EDUCATION

•Bachelor's Degree in Computer Science, Major AI and ML

2022–2026

Faculty of Computer Science, Benha National University

CGPA: 3.35

TECHNICAL PROJECTS

•Multi-Model Question Answering System

Interactive QA application built with Streamlit and Transformers

- a Question Answering (QA) web application that enables users to input a text paragraph and ask multiple questions about it.
The system leverages state-of-the-art transformer models to generate precise answers and display them in an intuitive, chat-like interface.
- Displays precise answer spans with confidence scores in a chat-like history interface.
- **Tech Stack:** Python, Transformers, Streamlit, Hugging Face

•Medical Chatbot with RAG

Intelligent medical concept retrieval system

- Implemented Retrieval-Augmented Generation (RAG) using LangChain and FAISS for semantic search.
- Integrated HuggingFace Transformers and Groq LLM for generating clear, medical-based answers.
- **Tech Stack:** Python, LangChain, FAISS, HuggingFace, Groq, Streamlit

•Meeting Transcriber & Summarizer (NTI)

Automated workflow for meeting productivity

- Automated downloading, transcription, summarization, and action item extraction.
- Drafted and sent follow-up emails automatically via Gmail SMTP.
- Built with Whisper ASR, CrewAI Agents, and Google Gemini for advanced language understanding.
- **Tech Stack:** Python, Whisper ASR, CrewAI, Google Gemini, Gmail SMTP

•Eye Gaze Tracking System (NAID)

Assistive AI system for quadriplegic patients

- Developed during Summer Program at NAID.
- Built an AI-powered system that enables quadriplegic patients to write and interact with technology using only their eye movements.
- Implemented real-time gaze tracking with OpenCV and Dlib.
- **Tech Stack:** Python, OpenCV, Dlib, Computer Vision

EXPERIENCE

•NLP Engineer Intern

Jun 2025 – Jan 2026

Part-time

Ben Soliman · Cairo, Egypt · Hybrid

- Worked on Sentiment Analysis and Data Visualization projects.
- Applied advanced NLP techniques to extract insights from business text data.
- Collaborated with the team to enhance NLP pipelines and optimize performance.
- **Tech Stack:** Python, Pandas, Matplotlib, Scikit-learn, Transformers

•NLP Engineer Intern

Aug 2025 – Sep 2025

Internship

NTI · Cairo, Egypt · Remote

- Built the **Meeting Transcriber & Summarizer system**, automating transcription, summarization, and follow-up actions.
- Focused on text preprocessing, feature engineering, and sentiment analysis.
- Developed and fine-tuned NLP models for real-world applications.
- **Tech Stack:** Python, Whisper ASR, CrewAI, Google Gemini

•Computer Vision Engineer Intern

Jul 2025 – Sep 2025

Internship

NAID · New Administrative Capital, Egypt · On-site

- Developed the **Eye Gaze Tracking System** to help quadriplegic patients write and interact with technology.
- Implemented computer vision algorithms for accessibility-focused applications.
- Utilized Python and vision tools to analyze and process visual data.
- **Tech Stack:** Python, OpenCV, Dlib

•ML Trainee

Jul 2024 – Aug 2024

Internship

BNU · Cairo, Egypt · On-site

- Studied and implemented supervised ML algorithms with practical projects.
- Gained proficiency in Python programming with Numpy, Pandas, Matplotlib, and Scikit-learn.
- Strengthened understanding of OOP, algorithms, and data structures.
- **Tech Stack:** Python, Numpy, Pandas, Matplotlib, Scikit-learn

•IT & Data Analysis Intern

Jul 2024

Internship

GAFI · Cairo, Egypt

- Acquired hands-on experience in IT infrastructure and network management.
- Developed skills in data analysis techniques, enhancing ability to interpret and utilize data effectively.
- Worked on data analysis and reporting for business insights.
- **Tech Stack:** Excel, SQL, Networking Tools

•Data Entry Specialist

Jun 2023 – Jul 2024

Part-time

Concept Accounting · Cairo, Egypt

- Managed and organized extensive datasets, ensuring data accuracy and integrity.
- Worked with IT systems and database tools to improve operational efficiency.
- **Tech Stack:** Excel, Microsoft Office, Databases

TECHNICAL SKILLS

- **Programming Languages:** Python (Advanced), SQL (Intermediate), C++ (Algorithms & Data Structures)
- **Machine Learning & Deep Learning:** Supervised & Unsupervised ML, Neural Networks, LSTM, BiLSTM, Transformers, Model Optimization, TensorFlow, Keras, PyTorch, Scikit-learn
- **Natural Language Processing (NLP):** Sentiment Analysis, Topic Modeling, Resume Classification, Text Preprocessing, Feature Engineering, arabic_resampler, bidi, wordcloud, NLTK, spaCy, DistilBERT, AraBERT, RAG
- **Computer Vision (CV):** Image Processing, Eye Gaze Tracking, Real-time Vision Systems, OpenCV, Dlib
- **Generative AI & LLMs:** Whisper ASR, Google Gemini, Prompt Engineering, Fine-tuning Transformers, CrewAI Agents, LangChain, FAISS, Groq
- **MLOps & Deployment:** Model Deployment with Gradio/Flask, API Development, Streamlit, Workflow Automation (SMTP Bots, Agents), Git/GitHub
- **Data Analytics & Visualization:** Pandas, Numpy, Matplotlib, Seaborn, Plotly, Excel, SQL
- **Tools & Platforms:** Google Colab, Jupyter Notebook, PyCharm, VS Code, Anaconda
- **Areas of Interest:** NLP, Computer Vision, Generative AI, Assistive Technology, Applied Machine Learning
- **Soft Skills:** Analytical Thinking, Problem Solving, Communication, Teamwork, Adaptability, Self-Learning

CERTIFICATES

- **NLP Training (NTI)** Certificate Link
- **Computer Vision Training (NAID)** Certificate Link
- **Fundamentals of Deep Learning (NVIDIA)** Certificate Link
- **Machine Learning Specialization** Certificate Link
- **Supervised Machine Learning** Certificate Link
- **Advanced Learning Algorithms** Certificate Link
- **Unsupervised Learning, Recommenders & RL** Certificate Link
- **AI For Everyone** Badge Link
- **Machine Learning with Python** Badge Link
